HISTORY

EN

The beanbag first became popular in the 1960s, and has celebrated innumerable comebacks since that time. It was developed by three Italian architects Piero Gatti, Cesare Paolini and Franco Teodoro. Their aim was to invent a seating design that comfortably conformed to the shape of body, similar to snow. In an effort to find the most comfortable filling, the inventors even experimented with lead and water at the beginning, and eventually found that small Styrofoam pearls had precisely the characteristics that produced the desired effect. The breakthrough for the „Sacco“ came when a photo of the bag was featured in an American newspaper. It caught the attention of a large chain of stores, which subsequently ordered 12,000 units from the inventors. Today, the beanbag is still a highly popular furniture item, as it combines a high degree of functionality with an ever changing array of shapes and patterns. Der Sitzsack erlangte seine Popularität erstmals in den 1960er Jahren und erlebte seitdem unzählige Comebacks. Entwickelt wurde er von den drei italienischen Architekten Piero Gatti, Cesare Paolini und Franco Teodoro. Sie wollten eine Sitzmöglichkeit erfinden, die sich ähnlich wie Schnee angenehm an den Körper anschmiegt. Für die am besten geeignete Füllung experimentierten die Erfinder anfangs sogar mit Blei und Wasser, schließlich hatten kleine Styroporkügelchen genau die erwünschten Eigenschaften. Zum großen Durchbruch des „Sacco“ verhalf ein Bild in einer amerikanischen Zeitung, welches eine große Kaufhauskette dermaßen überzeugte, dass direkt 12.000 Stück bei den Erfindern bestellt wurden. Noch heute ist der Sitzsack eines der beliebtesten Möbelstücke, da er eine hohe Funktionalität mit immer wechselnden Formen und Mustern kombiniert. Vreća za sjedenje prvi put je postala popularna 60-ih godina i od tada se stalno iznova vraća u modu. Izmislili su je tri talijanska arhitekta Piero Gatti, Cesare Paolini i Franco Teodoro. Oni su htjeli pronaći stolicu za sjedenje koja bi se ugodno priljubila uz tijelo, poput snijega. Kako bi otkrili najprikladnije punilo na početku su ovi izumitelji eksperimentirali čak s olovom i vodom te su na posljednju s malim kuglicama od stiropora postigli željenu kvalitetu. „Sacco“ je doživio pravi uspon zahvaljujući slici u američkim novinama koja je toliko očarala jednog trgovačkog lanac da je naručio 12.000 komada direktno od izumitelja. I danas je ova vreća za sjedenje jedan od omiljenih komada namještaja jer objedinjuje visoku funkcionalnost te oblike i uzorke koji se stalno izmjenjuju.
